All

I am not in my office right now and will not have access to my computer until later today or early Saturday.

I have peer reviewed these results and the evaluation methodology with several members of the Committee to ensure accuracy of the results and buy-in with the methodology

There were 431 responses as indicated in the column headings.

Column One had 262 respondents with 7 duplicates with the same IP number.

Column Two had 169 respondents with 19 duplicates with the same IP number.

I left the IP duplicates in the data on the assumption that multiple family members used the same network to take the survey. If we eliminate the duplicates, total responses will be reduced.

Responses were grouped as follows.

"Favorable" responses were grouped as "strongly agree" plus "agree" plus "neutral".

"Unfavorable" responses were grouped as "disagree" plus "strongly disagree".
