2020 Revaluation Project

Due to COVID-19, the 2020 revaluation project came to a halt. The portion of the town that did not receive a visit from Vision Government Solutions Inc., last year, will be visited this summer, starting the last week of June.

Data collectors will be performing property visits to ensure the accuracy of the town’s data. The data collected will include the measuring of the exterior of buildings. Interior information was verified using data mailers sent to every property owner in 2020. Vision’s data collectors will be carrying a company-issued photo identification badge and letter of introduction from the assessor.
